

APPLICATION DEVELOPMENT

The bottom line is that your business runs on a suite of applications.

The biggest challenge is how to develop reliable enterprise class software while lowering the costs and still meet tight deadlines. We can help. World class software development practices delivered through the highly interactive / cost efficient Near Shore® Model. Tim Tech Consults's Near Shore® Application Development span of services comprises full wing-towing solutions and specific project phase execution.

In order to respond to all sorts of IT needs Tim Tech Consults has created SSDP® (Tim Tech Consults's Software Development Process), which is framed as a phase-milestone methodology with specific work activities & product. The SSDP® can be ramped-up into any project from any point in its lifecycle. The SSDP® is the underlying foundation of our application development services. Its core elements are:

- Best practices obtained as results of our 23 years of experience in application development.
- Technology frameworks (re-usability, knowledge base)
- Process digitization (dashboards & scorecards) & SLA framework
- Alignment to Six Sigma & CMM compliance.

APPLICATION DEVELOPMENT SERVICES

Application Migration / Re-architecting. Legacy systems transformation into modern systems built on cutting-edge technologies/architectures.

Business Intelligence. Real-time business decision making out of massive volume of data. Focused on Informatica and Cognos.

Custom Application Development. Web or Client/Server software systems built on Java, C++, .net and Oracle.

System Integration: EAI techniques and tools to provide solutions to integrate: legacy mainframes, n-tier applications, ERPs, CRMs and SCMs. We have vast experience in implementing and integrating some of the leading packages such as SAP (7th time winner of the Award of Excellence in 8 years), Oracle, Peoplesoft and many others.

eCommerce Services. Development under a wide variety of standards: EDI x1®, EDIFACT, RosettaNet, XML, etc.

Tim Tech Consults received above average ratings for their custom development services

Celent ITS Vendor Solution Spectrum Report, 2010.

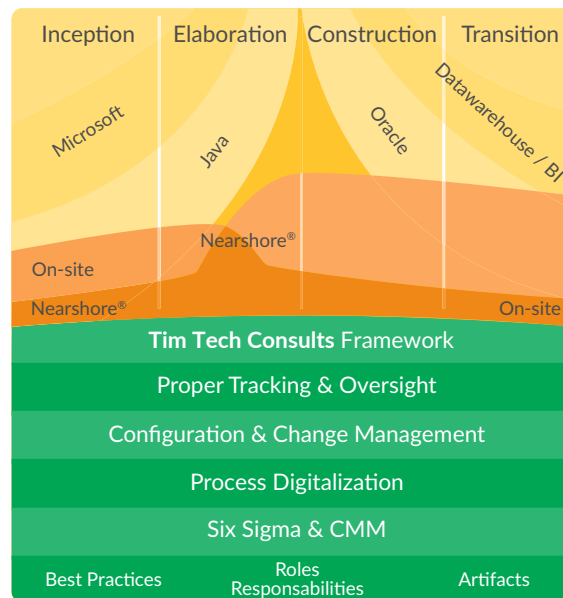

Open Source

Application development under Linux platforms, Database Servers, Application Servers (JBoss, Tomcat, PHP), Web Servers, IDEs, SCM, Firewalls, etc

Mobile

Based on an architectural driven development, we provide enterprise solutions built on top of a robust platform/framework, with ready to use application modules for vertical industries and a set of adapters to practically any packaged application or custom development. This way, we enable integration capabilities covering full-integration brokers, interfaces, and application servers, and support for most of the mobile platforms, from Research In Motion's BlackBerry, PalmOS, and Microsoft Windows Mobile, to phone, handheld, and Tablet PC devices.

- Our goal is to bring value through ever-evolving productivity gains by:
- Keeping the outsourcing risks to a minimum
- Constantly lowering the Total Cost of your Engagements
- Exploiting the Near Shore Model to the maximum
- Specializing in technologies, processes and people model
- 6 specialized networked GDCs distributed in the Americas & Europe that allow for a convenient global delivery model
- In-depth knowledge of Financial, Manufacturing and High Tech industries
- Transparency to track project status and associated SLAs on real time through our web based digitalization strategy
- Re-usable frameworks that optimize application development and reduce project life cycles

ABOUT TIM TECH CONSULTS
