

DIGITIZED GOVERNANCE

Governance and compliance involve detailed oversight of regulatory requirements, adherence to arcane rules and rigorous attention to detail.

While governance is essential to secure enterprise operations and effective supplier contract management, traditional tools, processes and practices are ad hoc, reactive and labor intensive. As a result, ROI of governance programs is often minimal.

Moreover, many businesses today prioritize digital technology initiatives, often sacrificing a focus on governance.

Tim Tech Consults's Digitized Governance framework provides the foundational transparency and visibility needed to effectively manage service delivery.

WE INTEGRATE:

Digital tools for data collection and analysis

Intelligent automation to enable focus on value

Process optimization to streamline workflow

VISIBILITY

- Transparency into third-party risk
- Data-based decision making
- Accountability for data creation and usage

ALIGNMENT

- Synchronization of objectives and requirements
- Integration of tools, people and processes
- Operational, tactical and executive reporting levels

INSIGHT

- Root cause and trends analysis
- Executive reporting tool enables rapid and informed decision making
- Enhanced supplier contract management
